DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 9, 12-18, directed to determining message contents for evaluating spam, classified in class 709, subclass 206.
- II. Claims 19-28 and 40, directed to message attachments, classified in class 709, subclass 207.
- III. Claims 29-39 and 41, directed to the transmittal of multiple messages, classified in class 709, subclass 229.

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility, such as analysis of message contents for filtering purposes. Invention II implements the use of message attachments, and invention III discloses the use of multiple messages. Each of these inventions may be implemented separately from one another.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
